CHAT API 1.0.0 OAS 3.0

Servers

Authorize

General

GET /v1/api/external/messages/{apiId}/{externalKey}
Consultar status/mensagens por externalKey

Retorna todas as mensagens por externalKey.

Parameters

Try it out

Name	Description
apiId * required `string` *(path)*	ID da configuração de API apiId
externalKey * required `string` *(path)*	Chave externa usada para correlacionar mensagens enviadas via API externalKey
pageNumber `integer` *(query)*	Número da página para paginação dos resultados *Default value* : 1 1

Responses

Code	Description	Links
200	Lista paginada de mensagens Media type **application/json** Controls `Accept` header. **Example Value** Schema	*No links*

```
{
  "messages": [
    {

Media type: **application/json** | Examples: **sessionInvalid**

Example Value Schema

```
{
  "error": "ERR_SESSION_NOT_AUTH_TOKEN"
}
```

404 Canal não encontrado ou erro ao iniciar sessão — *No links*

Media type: **application/json** | Examples: **noWhatsapp**

Example Value Schema

```
{
  "error": "ERR_NO_WAPP_FOUND"
}
```

Code	Description	Links

ChatFlow

POST /v1/api/external/{apiId}/{ticketId}/chat-flow-step Avançar etapa do ChatFlow via callback

Avança o ticket para a próxima etapa do fluxo quando ele estiver aguardando callback. Opcionalmente envia mensagem e/ou cria nota interna.

Parameters

Try it out

Name	Description
apiId * required `string` *(path)*	ID da configuração de API apiId
ticketId * required `integer` *(path)*	ID do ticket ticketId

Request body

application/json

Examples:

Avançar fluxo enviando mensagem

Example Value Schema

```
{
  "body": "Seu pagamento foi confirmado. Vamos prosseguir com o atendimento."
}
```

Responses

Code	Description	Links
200	Fluxo avançado com sucesso	*No links*

Media type

application/json

Controls `Accept` header.

Example Value Schema

```
{
  "ticket": {
    "id": 0,
    "status": "string",
    "contactId": 0,
    "userId": 0,
    "whatsappId": 0,
